MEYER AGAINST

Inauguration of Democratic Policies Would Be Frightful, Says He.

HARD ON NATIONAL BANKS

SUDDENLY FEELS GREAT CON-CERN FOR WAGEWORKER.

Hot Springs, Va., Aug. 23 .- Postmaster General Meyer, who is here conferring with Judge Taft, today expressed himself in an interview on the general political situation and on the Democratic proposition of guaranteeing national bank deposits, declaring the latter to be "one step farther toward socialism.'

"in the present campaign the Demoeratic candidate is bringing forward a short cut and plausible panacea against panies, the guaranteeing of deposits in national banks. At first sight this would appear to be a sort of insurance. Insurance, however, is a contract whereby one party voluntarily pays another party a fixed sum for indemnity against loss and not to exceed an agreed amount. The guaranteeing proposition compels by the law the banks to pay unknown sums for future losses and to an unknown amount and subject to an unknown risk over which they have no control.

From Meyer's Viewpoint.

"The guaranteeing of deposits by all national banks would mean nothing less than that the conservative and honestly managed banks would have to pay the debts of banks which have been badly and dishonestly managed Under this system there would be of obtaining deposits from going to parties and offering them 6 per cent for their deposits, claiming that they had no risks, as deposits are guaran-The bank in turn would have to make investments which would involve great risks in order to make any

"If successful, this would tend to increase speculation, which is one of the misfortunes of the present day, with the wildcat schemes and high finance that have been so much in evidence full and ample authority for what I do within the last year.

"The proposed system would result revolutionizing the methods of banks, and state banks and trust companies would be forced to enter under the same arrangements in order to have their deposits guaranteed, which would be an injustice to the national banks, as the stockholders in the national banks are subject to double liability for deposits, which is not true

"In New England and New York there are no stockholders in the savings banks. All the money earned is paid to the depositors. Therefore, 7t would result in a direct tax on the depositors and would decrease the returns which are coming to them.

"As Mr. Taft has said in his speech acceptance, 'the Republican party prefers the postal savings banks as method tried, safe and known to be safe, and as reaching many more people now without banking facilities than the new system proposed.'

"In the postal savings banks the deposits are guaranteed by the government, because the government has received the deposits and made itself responsible. They are led back into the channels of trade by depositing them in the national banks in the districts where they have been brought to the The system of guarantee ing deposits in national banks as pro posed by the Democratic party is one step farther toward socialism."

Charles E. Magoon, provisional gov ernor of Cuba, talked with Mr. Taft regarding conditions in Cuba. That the people of Cuba are qualified for selfgovernment is the positive assertion of Governor Magoon. Thomson Says Utah Grand Lodge is a Fake Organization

Christopher Diehl Says Thomson is a Faker and Then Some

On Aug. 13 there appeared in The Herald a dispatch from Helper, the burden of which was that Mathew McB. Thomson conferred a large number of degrees of the Masonic order in that place the previous night, and that there was grave question as to the authority of Mr. Thomson to confer any degrees in Masonry at all, the prevailing belief being that he was without power to "institute" lodges or to do the things which he did do.

Yesterday there came to The Herald office a letter from Mr. Thomson, who lives at Montpelier, Ida. This letter reads: at Montpelier, Ida. This letter reads:
